CONFIGURATION OPTIONS

- Main display size and secondary identification column
- Camera, secondary display and card module selection
- Receipt printer, contactless pad and lockable storage layout
- Caster wheels, brakes and power inlet position
- Windows, Android or Linux platform choice

MODULE OPTIONS

Fingerprint terminal

A fingerprint capture module for identity verification at registration, access control or payment steps. Sensor type, capture window position and SDK support are agreed during specification.

Passport reader

A passport and travel-document reader for identity checks at hotel, transport and public-service counters. MRZ reading is standard; chip reading depends on the reader module selected.

Face recognition camera

A camera module for face-based check-in, liveness checks or queue pre-registration, subject to local privacy rules and the identity platform you already run.

TYPICAL APPLICATIONS

- Inpatient floors for bedside payment
- Temporary screening and triage points
- Discharge settlement desks

Request a quotation

Send the application, peripheral list, operating system choice and estimated quantity. We reply with the closest build, the open questions and the next step.

Reference build. Screen size, module mix, electrical ratings and certification scope are confirmed in writing for each project. Values describe the standard configuration and may change with selected options. © 2026 Shenzhen Xinyuehong Information Technology Co., Ltd.
