Border Inspection Service Island

A service island for port and land-crossing checkpoints: guidance display above, working touchscreen below, four reader slots, keyboard and contactless pad over a high-capacity cabinet.

TECHNICAL SPECIFICATIONS

Main display	32 inch touchscreen, 1920 × 1080
Guidance display	21.5 inch upper screen, 1920 × 1080
Touch	10-point projected capacitive (PCAP), tempered glass
Card reading	Four independent reader slots, module mix assigned per project (ID, bank card, contactless; document readers optional)
Input	Full-size keyboard and contactless pad on the counter deck
Cabinet	Island cabinet with consumable storage and lockable service panels
Mounting	Floor-standing island base, bolt-down option
Operating system	Windows / Android / Linux
Computing platform	Android: Rockchip RK3568 or RK3399 · Windows and Linux: Intel Celeron J6412, Core i3 / i5 optional · 4–16 GB RAM, 64–512 GB SSD

EMBEDDED MODULES

- Guidance display
- Touchscreen
- Four card-reader slots
- Keyboard
- Contactless pad
- Large capacity cabinet

CONFIGURATION OPTIONS

- Four reader slots assigned to the credential types you accept
- Guidance display above with queue or channel content
- Keyboard and contactless pad positions for officer-assisted use
- Large-capacity lockable cabinet for stock and spares
- Windows, Android or Linux with your inspection client

MODULE OPTIONS

Fingerprint terminal

A fingerprint capture module for identity verification at the checkpoint, access control or payment steps. Sensor type, capture window position and SDK support are agreed during specification.

Passport reader

A passport and travel-document reader for identity checks at border-control, immigration and travel counters. MRZ reading is standard; chip reading depends on the reader module selected.

Face recognition camera

A camera module for face-based verification at the checkpoint, liveness checks or queue pre-registration, subject to local privacy rules and the identity platform you already run.

TYPICAL APPLICATIONS

- Port and land-crossing lanes with mixed credential types
- Immigration halls issuing permits and collecting fees
- Multi-step traveller processing before the counter
