Computing platform	Android: Rockchip RK3568 or RK3399 · Windows and Linux: Intel Celeron J6412, Core i3 / i5 optional · 4–16 GB RAM, 64–512 GB SSD

EMBEDDED MODULES

- Top display
- Touchscreen
- Multiple card readers
- Receipt printer
- Camera module

CONFIGURATION OPTIONS

- Top display for announcements and wayfinding content
- Identity card, social-security and bank card reader set
- Receipt printer and A4 document print path
- Camera or biometric module for identity checks
- Windows, Android or Linux with the government client

MODULE OPTIONS

Fingerprint terminal

A fingerprint capture module for identity verification at registration, access control or payment steps. Sensor type, capture window position and SDK support are agreed during specification.

Passport reader

A passport and travel-document reader for identity checks at hotel, transport and public-service counters. MRZ reading is standard; chip reading depends on the reader module selected.

Face recognition camera

A camera module for face-based check-in, liveness checks or queue pre-registration, subject to local privacy rules and the identity platform you already run.

TYPICAL APPLICATIONS

- Citizen service halls and one-stop centres
- Social-security enquiry and certificate printing
- Public utility bill enquiry and payment
