| Computing platform | Android: Rockchip RK3568 or RK3399 · Windows and Linux: Intel Celeron J6412, Core i3 / i5 optional · 4–16 GB RAM, 64–512 GB SSD |

## EMBEDDED MODULES

- Recessed display
- PIN keypad
- Card reader
- Cash/document aperture
- Secure service cabinet

## CONFIGURATION OPTIONS

- Recessed display with privacy filter and keypad type
- Card reader, cash handling or document aperture selection
- EPP keypad and certification requirements review
- Reinforced cabinet with separate locking front and rear doors
- Windows, Android or Linux platform with the acquirer stack

## MODULE OPTIONS

### Fingerprint terminal

A fingerprint capture module for identity verification at registration, access control or payment steps. Sensor type, capture window position and SDK support are agreed during specification.

### Passport reader

A passport and travel-document reader for identity checks at hotel, transport and public-service counters. MRZ reading is standard; chip reading depends on the reader module selected.

### Face recognition camera

A camera module for face-based check-in, liveness checks or queue pre-registration, subject to local privacy rules and the identity platform you already run.

## TYPICAL APPLICATIONS

- Bank branch self-service corners
- Cash deposit and withdrawal points
- Card issuance and PIN change stations
