Vertical Touchscreen Ticketing Kiosk

A floor-standing terminal that puts a vertical touchscreen, ticket printer, QR scanner and contactless reader into one cabinet for queue and ticket counters.

TECHNICAL SPECIFICATIONS

Display	32 inch vertical touchscreen, 1920 × 1080
Touch	10-point projected capacitive (PCAP), tempered glass
Ticket printer	80 mm thermal printer with ticket outlet and auto-cutter
Scanner	1D barcode and 2D QR code scanner at the deck
Card reading	Contactless reader (ISO 14443 A/B)
Cabinet	Cold-rolled steel, powder-coated, lockable service door
Mounting	Floor-standing base with lockable castors
Operating system	Windows / Android / Linux
Computing platform	Android: Rockchip RK3568 or RK3399 · Windows and Linux: Intel Celeron J6412, Core i3 / i5 optional · 4–16 GB RAM, 64–512 GB SSD

EMBEDDED MODULES

- Vertical touchscreen
- Receipt printer
- QR code scanner
- Contactless card reader

CONFIGURATION OPTIONS

- Screen size and portrait format selected per project
- Ticket printer width, paper path and cutter option
- QR reader, contactless pad and card reader combination
- Cabinet colour, logo placement and front graphics
- Queue back-end integration and remote status monitoring

MODULE OPTIONS

Fingerprint terminal

A fingerprint capture module for identity verification at registration, access control or payment steps. Sensor type, capture window position and SDK support are agreed during specification.

Passport reader

A passport and travel-document reader for identity checks at hotel, transport and public-service counters. MRZ reading is standard; chip reading depends on the reader module selected.

Face recognition camera

A camera module for face-based check-in, liveness checks or queue pre-registration, subject to local privacy rules and the identity platform you already run.

TYPICAL APPLICATIONS

- Transport halls and attraction entrances
- Hospital service lobbies with queue tickets
- Government service centre ticket counters
