Government Services Kiosk with Document Readers

A Windows-based service counter built around document and card reading: ID documents, social-security cards, bank cards and printed receipts in one session.

TECHNICAL SPECIFICATIONS

Display	27 inch portrait touchscreen, 1920 × 1080
Touch	10-point projected capacitive (PCAP), tempered glass
Document reading	ID document reader with MRZ and second-generation ID support
Card reading	Social-security card reader, bank card reader and contactless pad
Scanner	1D barcode and 2D QR code scanner
Receipt printer	80 mm thermal printer with auto-cutter
Mounting	Floor-standing base with lockable castors
Operating system	Windows / Android / Linux
Computing platform	Android: Rockchip RK3568 or RK3399 · Windows and Linux: Intel Celeron J6412, Core i3 / i5 optional · 4–16 GB RAM, 64–512 GB SSD

EMBEDDED MODULES

- ID document reader
- Social-security card reader
- Receipt printer
- Bank card reader
- Barcode scanner
- Caster base

CONFIGURATION OPTIONS

- ID document reader and social-security card reader selection
- Bank card reader and receipt printer layout
- Barcode scanner and handheld scanner pairing
- Floor-standing cabinet on fixed feet or caster base
- Windows, Android or Linux image with required regional software

MODULE OPTIONS

Fingerprint terminal

A fingerprint capture module for identity verification at registration, access control or payment steps. Sensor type, capture window position and SDK support are agreed during specification.

Passport reader

A passport and travel-document reader for identity checks at hotel, transport and public-service counters. MRZ reading is standard; chip reading depends on the reader module selected.

Face recognition camera

A camera module for face-based check-in, liveness checks or queue pre-registration, subject to local privacy rules and the identity platform you already run.

TYPICAL APPLICATIONS

- Municipal service halls
- Social-security and benefits counters
- Public records and certificate requests
