Parking Payment Terminal

A slim dark-cabinet terminal with a vertical display above an angled payment deck, laid out for card, code and receipt handling in car parks.

TECHNICAL SPECIFICATIONS

Display	21.5 inch portrait display, 1920 × 1080
Touch	10-point projected capacitive (PCAP) with anti-glare glass
Payment deck	Angled deck with card reader, contactless pad and ticket slot
Scanner	1D barcode and 2D QR scanner for ticket and plate codes
Cabinet	Steel enclosure with weather-resistant front options
Mounting	Floor-standing plinth for kerbside or lane-side installation
Operating system	Windows / Android / Linux
Computing platform	Android: Rockchip RK3568 or RK3399 · Windows and Linux: Intel Celeron J6412, Core i3 / i5 optional · 4–16 GB RAM, 64–512 GB SSD

EMBEDDED MODULES

- Vertical display
- Angled payment deck
- Card reader
- Scanner area

CONFIGURATION OPTIONS

- Display size and readable daytime brightness level
- Card reader, QR scanner and receipt printer on the angled deck
- Heater and ventilation package for cold or humid sites
- Night visibility, lighting strip and wayfinding graphics
- Windows, Android or Linux platform with the parking software

MODULE OPTIONS

Fingerprint terminal

A fingerprint capture module for identity verification at registration, access control or payment steps. Sensor type, capture window position and SDK support are agreed during specification.

Passport reader

A passport and travel-document reader for identity checks at hotel, transport and public-service counters. MRZ reading is standard; chip reading depends on the reader module selected.

Face recognition camera

A camera module for face-based check-in, liveness checks or queue pre-registration, subject to local privacy rules and the identity platform you already run.

TYPICAL APPLICATIONS

- Shopping mall and airport car parks
- Kerbside and municipal parking zones
- Hotel and campus visitor parking
