Sloped Touch Information Kiosk

A horizontal touchscreen set into a curved enclosure, aimed at directories, wayfinding and self-service lookup in public buildings.

TECHNICAL SPECIFICATIONS

Display	32 inch horizontal sloped touchscreen, 1920 × 1080
Touch	10-point projected capacitive (PCAP), anti-glare glass
Enclosure	Curved enclosure with sloped reading angle for standing users
Mounting	Floor-standing weighted base
Options	NFC pad, barcode scanner, receipt printer, wheelchair-height second screen
Operating system	Windows / Android / Linux
Computing platform	Android: Rockchip RK3568 or RK3399 · Windows and Linux: Intel Celeron J6412, Core i3 / i5 optional · 4–16 GB RAM, 64–512 GB SSD

EMBEDDED MODULES

- Horizontal touchscreen
- Curved enclosure

CONFIGURATION OPTIONS

- Screen size and sloped reading angle
- Landscape or portrait content layout
- Optional NFC reader, QR scanner or camera module
- Floor plate, castor base or bolted-down installation
- Windows, Android or Linux image with the content player

MODULE OPTIONS

Fingerprint terminal

A fingerprint capture module for identity verification at registration, access control or payment steps. Sensor type, capture window position and SDK support are agreed during specification.

Passport reader

A passport and travel-document reader for identity checks at hotel, transport and public-service counters. MRZ reading is standard; chip reading depends on the reader module selected.

Face recognition camera

A camera module for face-based check-in, liveness checks or queue pre-registration, subject to local privacy rules and the identity platform you already run.

TYPICAL APPLICATIONS

- Mall directories and store finders
- Museum and exhibition information points
- Corporate lobby visitor guidance
