Wall-Mounted Hospital Payment Terminal

A wall-mounted unit that compresses registration, payment and printing hardware into a shallow cabinet for corridors, lift lobbies and nurse stations.

TECHNICAL SPECIFICATIONS

Display	21.5 inch wall-mounted touchscreen, 1920 × 1080
Touch	10-point projected capacitive (PCAP), tempered glass
Card reading	IC card, bank card and contactless reader
PIN pad	Encrypting PIN pad with privacy hood
Receipt printer	80 mm thermal printer with auto-cutoff slot
Camera	Front camera for face capture
Mounting	Wall bracket or VESA plate, cable entry from the rear
Operating system	Windows / Android / Linux
Computing platform	Android: Rockchip RK3568 or RK3399 · Windows and Linux: Intel Celeron J6412, Core i3 / i5 optional · 4–16 GB RAM, 64–512 GB SSD

EMBEDDED MODULES

- Wall-mounted touchscreen
- Receipt printer
- Camera
- Card reader
- PIN pad
- Contactless reader

CONFIGURATION OPTIONS

- Screen size chosen against available wall width
- Receipt printer orientation and paper roll access
- Camera, card reader and PIN pad placement
- Wall bracket, cable routing and service opening design
- Windows, Android or Linux build with the chosen client

MODULE OPTIONS

Fingerprint terminal

A fingerprint capture module for identity verification at registration, access control or payment steps. Sensor type, capture window position and SDK support are agreed during specification.

Passport reader

A passport and travel-document reader for identity checks at hotel, transport and public-service counters. MRZ reading is standard; chip reading depends on the reader module selected.

Face recognition camera

A camera module for face-based check-in, liveness checks or queue pre-registration, subject to local privacy rules and the identity platform you already run.

TYPICAL APPLICATIONS

- Ward corridors beside nurse stations
- Lift lobbies on multiple floors
- Registration and top-up points beside waiting areas
